## Toallitas flushables

El 94% de las toallitas en el mercado no son flushables, ya que están hechas con fibras de plástico, por lo que bajo ningún concepto pueden tirarse por el retrete. El 6% restante, aunque sí son flushables, contienen algún tipo de ligante químico. Nuestras toallitas, además de ser flushables, son 100% naturales y biodegradables, ya que están hechas de papel, una materia prima natural y renovable con certificación forestal PEFC. No contienen aglutinantes químicos y proporcionan óptima resistencia en húmedo, alta absorción y rápida desintegración.
